

I did this because I have to, to pass this class and not get a failing grade. If I don't I will get at least a fifty on each test grade. Then that will bring my grade down.

Left

$$Y = \frac{2}{3}X + 16$$

$$Y = -8X + 9$$

$$Y = -16X - 4$$

$$Y = \frac{5}{6}X - 15$$

Right

$$Y = -\frac{3}{4}X + 17$$

$$Y = -\frac{11}{12}X + 11$$

$$Y = -\frac{3}{5}X + 3$$

$$Y = -X - 3$$

$$Y = -Y = X - 13$$

$$Y = -\frac{2}{3}X - 16$$
